## Managed Services:

24x7x365 outsourced database administration, support, performance monitoring and high availability support for Microsoft SQL Server and Oracle.

## Database Audit:

Our Server Health Check provides CIO's and IT Managers with an audit of their environment to assess if their Microsoft SQL Server and Oracle platforms are appropriately configured.

## SQL Server Performance Tuning:

Provide best practice guidelines to isolate, tune and address Microsoft SQL Server performance bottlenecks.

## Database Migration:

Provide migration readiness reviews, test migrations, management and post migration reviews for environments such as MySQL, DB2 and Sybase.

## BI Services:

Our holistic BI services provide a strategic plan and delivery model from proof of concept to design and project delivery. Our Professional Services team can assist from Database Design through to Advances Analytics, Machine Learning and all aspects of BI Project Delivery.
